The proposed Town Plan re-adoption is consistent with the specific goals outlined in 24 V.S.A. §4302(C). The Plainfield Planning Commission has created a revised Town Plan in draft form that brings the information and goals and strategies up to date. There are additions and updates to all 10 sections of the plan. New infrastructure in town such as the park and ride, the village park and recreational field improvements are now current in the plan. The Land Use section has many of the same goals as the previous plan and has added a goal of creating a data base of resources relevant to local planning. The Transportation section speaks to the proposed changes to the Rt 2 intersection and the pedestrian bridge. The new maps show proposed changes to the zoning districts, conserved and managed lands, forest block and habitat connectors, natural resources, and historic buildings in town.
