

**Plainfield Water/Waste Water Commission
Emergency Meeting Minutes for October 10, 2017**

Present: Mary Lane, Tim Phillips, Tristan MacGregor-Stewart, Greg Chamberlin
3:00 PM - Meeting called to order.

Agenda

Agenda was approved

Discuss Repair/Replacement of wastewater pipe serving Goddard and a portion of Greatwood Drive.

- There is a blockage in the 4" line after Goddard's service building. It looks like salt from the water softener that Goddard has installed. Hartigan's vacuum truck can't move it. We will have to dig the line up. Greg had been planning to upgrade the entire line to 6" (which is required with the new connections being made) and his preference is to replace line with a new 6" line versus paying for a 4" auger and trying to make the existing line work. Albert St Cyr already has equipment on site (he is doing work at one of the new house sites on Greatwood) and has made a reasonable quote to do the needed digging. He will speak to Linda to update his insurance information with the town.
- The Commission agreed that Greg's plan to replace line with new 6" line made the most sense and that using Albert St Cyr for the excavating was prudent.
- Greg will draft a letter to Goddard advising them of the need to pay for the work as it appears to result entirely from their softening system.

The meeting adjourned at 3:15PM
